SMARTTEAM - Community Workspace (CMT)

SMARTTEAM V5R18

User Roles

SMARTTEAM - Community Workspace

To enable easy, effective and secure data-sharing and communications across the value chain.

Product overview

SmarTeam Community Workspace is a web-based, project-oriented, collaborative portal that enables global product teams to easily, securely, and cost-effectively collaborate on and manage product information within their extended enterprise and across the supply chain, creating a true e-business on demand environment. Within unique web portals, virtual product development communities after passing through rigorous authorization collaborate on a defined set of data from within the SmarTeam database. Workflow participation is enabled through the SmarTeam - Workflow product.

By enabling online collaboration, SmarTeam Community Workspace brings e-Business across the extended enterprise and across the supply chain. The result is that companies leverage and extend their intellectual property with maximum flexibility, generating a true "e-Business on demand" environment.

CMT is available through the SmarTeam Community Workspace Configuration (SCT) only.

Product Highlights

- ❑ Project-oriented, product information collaboration across the supply chain
- ❑ Web-based project-communities relate information to appropriate members
- ❑ Corporate information sharing from multiple data sources

- ❑ Document and revision management over the web
